

Connect With Students Using

ACEMAPP Communities

Your organization continually invests in the education of students through clinical education. ACEMAPP helps you stay connected with these students as they graduate to become working professionals by encouraging them to join your community and enabling you to recruit these Professionals as new hires. Below, you'll find the key benefits of building an ACEMAPP community.

Manage ROI

Your organization invests in students by providing educational experiences every year.

ACEMAPP automatically encourages those students to follow your professional "community" once they've been assigned to a rotation.

View Database

You will be able to view a database of individuals who have chosen to follow your organization's community in ACEMAPP.

Search for students based on graduation date to easily communicate with upcoming or recent graduates.

Share Updates

Share information about your organization using your community profile page.

You may also post updates, such as information about upcoming career fairs and highlighted job openings, to keep your community of students engaged.

The communities feature costs \$600/year. Contact us to get started!
